INTRODUCTION

This publication is the summary report of the Conservation Reserve Program of the Soil Bank for calendar year 1958. The Agricultural Act of 1956, Public Law 540, 84th Congress, approved May 28, 1956, established the Conservation Reserve Program. Data are presented relative to farmer participation by States in this program.

Information with respect to the extent of conservation practices performed and of acreages qualifying for annual payments in 1958, and amounts of assistance given were obtained from performance reports filed by participants in the program. The data included in this report were collected by county and State Agricultural Stabilization and Conservation Committees. This report covers primarily contracted land for which the first rental was earned for the years 1956, 1957 or 1958, but some tables show data for practices carried out in calendar year 1958 on contracts signed in the fall of 1958 but which will not earn rental payment until 1959. Practices called for on contracts approved prior to January 1, 1959 which had not been completed at the end of calendar year 1958 are to be completed in future years and will be reported in future summaries.

The Conservation Reserve of the Soil Bank is one of the tools being used to reduce agricultural surpluses. Its primary purpose is to divert land from the production of crops. It also provides assistance to farmers in establishing and maintaining protective cover or other sound conservation practices on the land placed in reserve.

The Conservation Reserve is a voluntary program, under which the participating farmer signs a contract to withdraw a specified acreage of cropland from production for a period up to 10 years. He also agrees to comply with any acreage allotments on his farm and to reduce his total crop acreage by the amount of land placed in the reserve. The farmer also agrees to provide adequate vegetative or other approved conservation cover on the land placed in the reserve. Under this contract, the Federal Government agrees to make an annual rental payment for the land held out of production and to assist with the cost of establishing the conservation practices on the reserve tract.

During the fall of 1958 applications were taken for 1959 contracts. Detailed data are omitted for 1959 applications and contracts from the tables herein except for practices carried out before January 1, 1959. A brief description of the 1958 fall signup for 1959 follows:

1. It is estimated that approximately 13 million acres of cropland will be added to the land previously in the program. The total acres under contract will account for about five percent of all U. S. cropland as shown in the 1954 Census of Agriculture.
2. The signup campaign in the fall of 1958 indicates that changes made on the basis of earlier experience -- chiefly higher rental payments per acre and greater incentives for entire eligible acreage participation -- are bringing more farmers and more good quality land into the program. Only about two-thirds of the cropland offered for 1959 contracts could be accepted within the funds available, and a bid and acceptance system was used to give priority to producers making the best offers.
3. The land which can be taken in the 1958 fall signup for 1959 would normally have produced large quantities of farm commodities to add to existing surpluses. It is estimated that this land, together with land already under contract, would have represented 3.7 million acres of corn, 3.6 million acres of grain sorghums, 2.4 million acres of wheat, and about 10 million acres of hay, pasture and other crops and uses. At normal yields, this would produce 143 million bushels of corn, 124 million bushels of oats, 83 million bushels of grain sorghums, 45 million bushels of wheat, more than 300,000 bales of cotton, nearly 6 million tons of hay and many other crops on a similar scale.
4. About 20 percent of the farmers participating in the program through 1958 placed all their cropland in the reserve, and indications are that about three-fourths of the land offered in the fall of 1958 for 1959 will be in this category. A farmer who places all his cropland in the Conservation Reserve can continue to live on the farm, maintain a home garden and use the permanent pasture and orchard land. Placing the entire eligible cropland in the reserve removes the entire crop production potential of the farm, including the allotment-quota crops, since none of the acreage is left for more intensive farming.
5. Grass cover continued to be the most popular of the conservation practices carried out on Conservation Reserve land, especially in the ten Great Plains States. In this area, the program is stimulating the return to grass of vast areas of dryland devoted to the production of grains. Many farmers in this area have been unable to undertake the difficult and expensive operation to convert this land back to grass. Much of this land will remain in grass after the expiration of the Conservation Reserve contracts.

6. Estimates for 1959 and complete data for previous years show that tree planting ranks highest among the conservation uses of the program in the southeast, particularly in South Carolina and Georgia. Tree planting contracts are for a ten-year period. When cropland goes out of production and is planted to trees, the land is diverted from crop production for a long period of time.
7. Practices designed especially for wildlife protection are gaining increased acceptance by participating farmers and general approval of sportsmen and wildlife organizations.

Agriculture Information Bulletin No. 185 published in March 1958 by the Agricultural Research Service of the Department of Agriculture shows results of a study conducted in six selected geographical areas pertaining to extent and reasons for participation and nonparticipation, impact on crop production, quality of land contracted, and related factors.

Commodity Stabilization Service and
Agricultural Conservation Program Service
United States Department of Agriculture
Washington 25, D. C.

Issued September 1959

Table 1.--Summary of new conservation reserve contracts, reserve acres, cover to be maintained and cover to be established, United States, 1956, 1957 and 1958 1

Item	Unit	1956-57 contracts <u>2</u>	1958 contracts
Contracts <u>3</u>	Number	82,588	46,745
Reserve acres:			
Placed under contract	Acres	6,537,932	3,467,118
Already in cover	Acres	737,129	490,443
To have acceptable cover established	Acres	5,800,803	2,976,675

1 Data in this table are as of July 15, and are therefore somewhat in excess of the year-end facts reported elsewhere due to terminations after July 15.

2 Records were not maintained separately for 1956 and 1957 contracts because they were approved concurrently during most of the sign-up campaign.

3 Number of 1956-57 contracts is number in force on July 15, 1957. The number of 1958 contracts contains some duplication of 1956-57 contracts where land was added in 1958 to acreage already under contract in 1957.

Table 2.--Estimated reduction in United States acreage and production for specified crops and land-uses by Conservation Reserve Programs for 1957 and 1958

Crop or land use	Acres reduced (Thousand) <u>1</u>		Production reduced (Thousand)			
	1957	1958	Unit of production	1957 <u>2</u>	1958 <u>2</u>	Total
Corn	891	1,458	Bushels	32,936	57,732	90,668
Wheat for grain	497	776	Bushels	9,399	17,845	27,244
Cotton	114	180	Bales	69	146	215
Peanuts picked and threshed	39	61	Pounds	27,051	57,668	84,719
Rice	<u>3</u> 2	1	Bags (100 lbs.)	9	30	39
Tobacco	2	3	Pounds	2,299	4,969	7,268
Oats for grain	1,149	1,842	Bushels	37,676	71,470	109,146
Barley for grain	371	589	Bushels	9,825	17,912	27,737
Soybeans for grain	190	341	Bushels	3,712	6,750	10,462
Sorghum for grain	1,937	2,560	Bushels	53,649	84,466	138,115
Flaxseed	152	246	Bushels	747	2,288	3,035
Dry edible beans	25	35	Bags (100 lbs.)	240	313	553
Irish potatoes	11	18	Cwt.	2,445	3,848	6,293
Hay and rotation pasture	447	868	Tons, hay equivalent	684	1,389	2,073
Vegetables	64	94	xx	xx	xx	xx
Other crops	479	717	xx	xx	xx	xx
Summer fallow	168	265	xx	xx	xx	xx
Idle and failure	96	157	xx	xx	xx	xx
Total, including duplication <u>4</u>	6,632	10,211	xx	xx	xx	xx
CR acres	6,427	9,896	xx	xx	xx	xx

1 Estimated acres which would have been devoted to this use without a Conservation Reserve Program

2 Production estimated as acreage reduced multiplied by crop yield for the year adjusted for quality and location of land under contract.

3 Less than 500 acres.

4 Total exceeds Conservation Reserve acres as a result of double cropping, crop failure replanted, and similar unusual land uses.

Table 3.--Farms and individuals for which annual payments were computed, acreages on which such payments were computed, rates per acre, and amount of computed payment under the Conservation Reserve Program, by States, 1958

1/ Includes all liming material applied in connection with complete and component practices.

2/ Total assistance for all practices performed, excluding the amount of payment withheld, forfeited, or refunded due to violations, etc.

* Includes practices and practice assistance on contracted acreages with beginning years of 1956, 1957 and 1958; and also includes 1959 in those cases where practices were performed in the fall of 1958 on 1959 contracted acreages.

Table 14.--Disbursements, by type of payment, calendar year 1958, by months and semi-annually, under the Conservation Reserve Program, United States ^{1/}

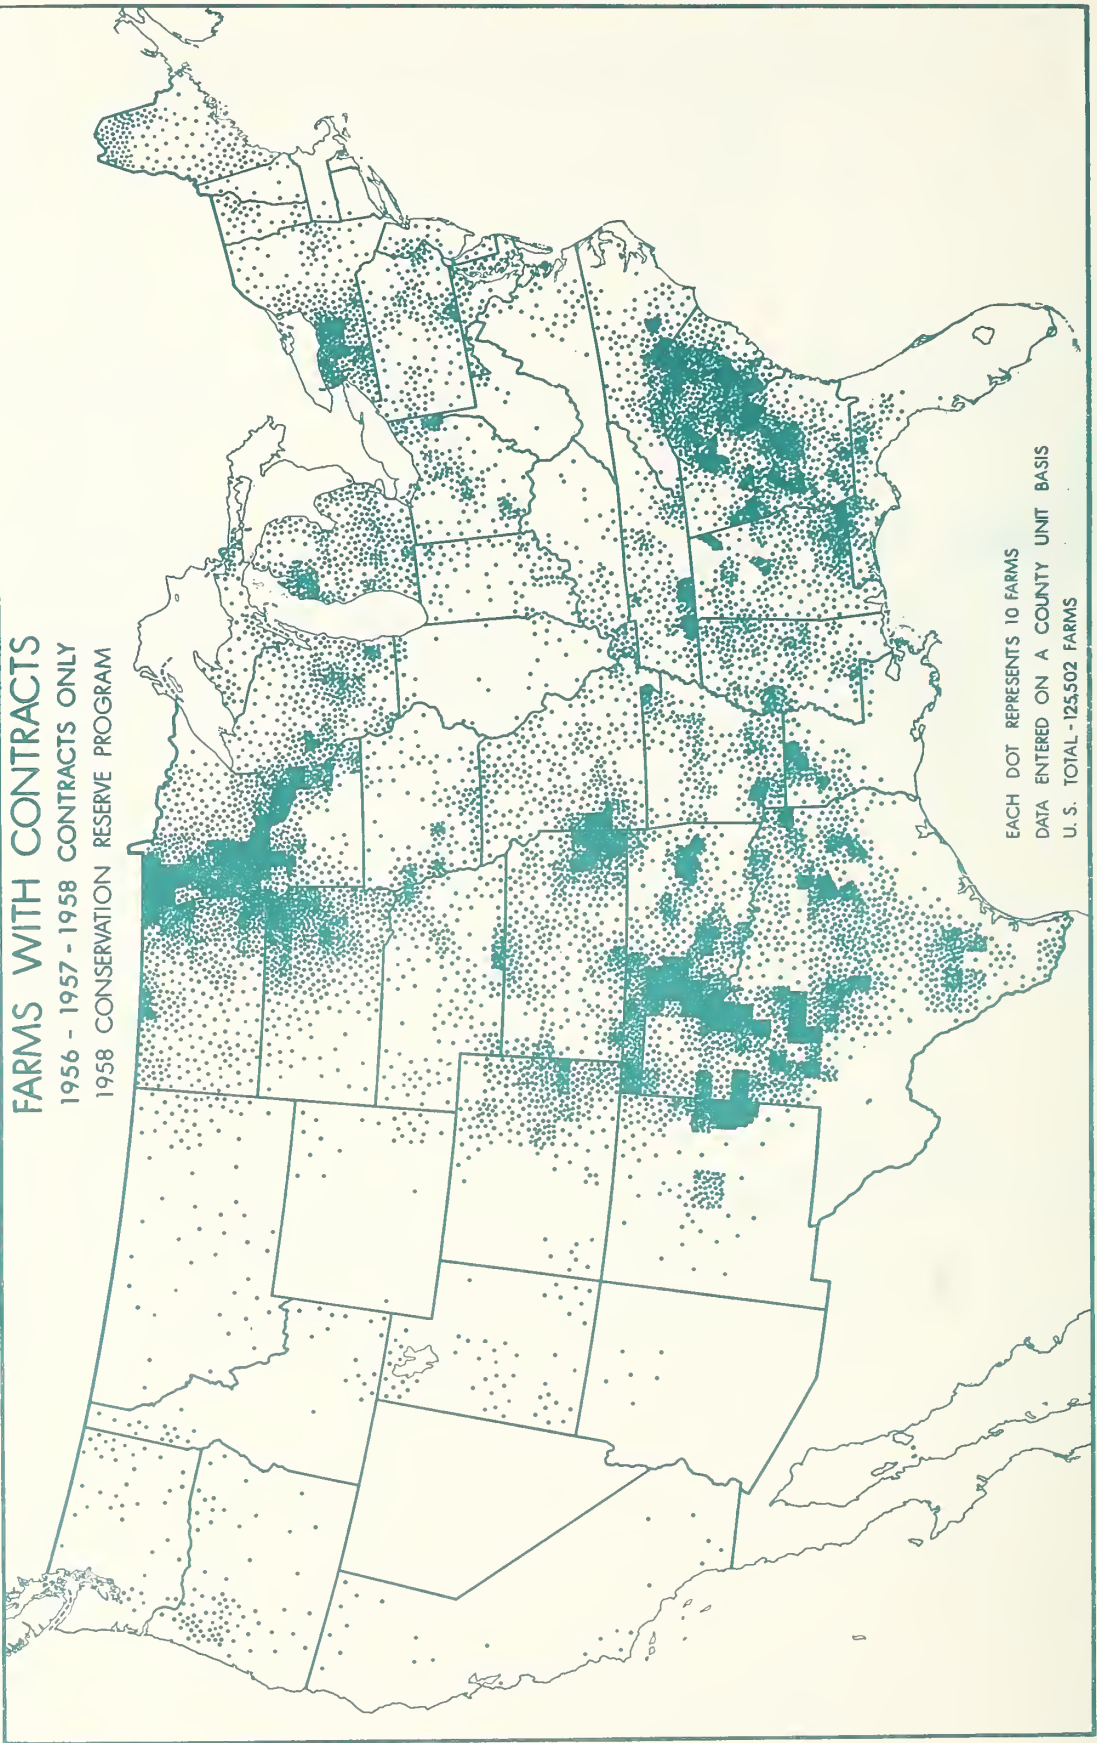

Months	Annual payment	Practice payment	Total payment
	<u>Dollars</u>	<u>Dollars</u>	<u>Dollars</u>
January.....	7,624,476	2,270,495	9,894,971

Total - 12 months.....	89,990,028	31,861,594	121,851,622

^{1/} Includes disbursements made during calendar year 1958 only. The data may include some payments on contracts for which compliance was completed during calendar year 1957, but for which the actual disbursement was not made until calendar year 1958. Also included are some disbursements for practices completed before December 31, 1958 on acres placed under contract for the 1959 program. The above data include all sight drafts to producers and sight drafts and treasury checks to vendors for materials and services rendered. Disbursements for practice payments and annual payments, which were refunded by producers during 1958 due to contract violations and other reasons, are excluded.
